

Badge tester

Quick check of pedestrian badges

MAKES YOUR PEDESTRIAN PROTECTION SYSTEMS MORE RELIABLE.

Principle

The badge tester makes it possible to check the operation of pedestrian badges before or during work. It is very simple to install and fully integrates into your protection procedures. RFID interfaces may be integrated as an option.

Examples

OBJECTIVES

- 1- Ensure the badge is operational.
- 2- Option: open a door automatically.
- 3- Ensure the badge is worn in a zone.
- 4- Control accesses.
